

enterprise edition™

**Need to train more employees, customers, and partners
in less time with an ever-shrinking budget?**

Want to increase communication while reducing travel and teleconferencing? Elluminate *Live!* Enterprise Edition is the clear choice for live eLearning and Web conferencing. It's powerful, flexible, affordable and easy to use. **Experience the difference today!**

Enable Dynamic Collaboration Throughout Your Enterprise

"We realized a 1000% ROI within the first 18 months of using Elluminate Live!"

Mike Bennett, T-Mobile

Tired of the cost and hassles of airplane travel and teleconferencing? With Elluminate *Live!*, you can reach employees, partners, and customers in new ways. Improve information exchange, encourage idea sharing, and facilitate collaboration—while reducing costs and increasing productivity. And that means a rapid return on your investment.

Establish virtual conference rooms for your employees to conduct cost-effective, online staff meetings, sales presentations, employment interviews, brainstorming sessions, and much more. Eliminate unnecessary travel and teleconferencing while maintaining the effectiveness of a face-to-face meeting. With Elluminate *Live!*, you can empower your employees to be more productive, effective, and efficient in every department of your real-time organization.

Extend Education Beyond the Corporate Classroom

"Elluminate Live! has proven to be more effective than classroom training by allowing us to train more users, more often, without the need to increase our budget and people resources."

Jennifer Foster, Royal LaPage

Why live eLearning? Because it can be even more effective—and affordable—than traditional classroom or self-paced training. Whether it's new product training for your sales force, professional development for employees, a sales demo for a key prospect, or even a user conference, Elluminate *Live!* is an intuitive, moderator-led environment that delivers real-time, interactive education that encourages real learning.

What makes Elluminate the leader in live eLearning and Web conferencing technology?

- Superior user experience, even on low Internet connection speeds
- Crystal-clear audio that enables dynamic interaction of face-to-face classroom
- Universal access for Windows, Mac, Solaris, and Java Desktop System (Linux) users
- Feature and function-rich learning environment designed with pedagogy in mind
- Advanced moderator tools for easy content creation, presentation, and control
- Collaborative Communication Framework (CCF) for optimal connectivity, reliability, and performance
- In-sync communication that supports all learning styles, with no user left behind
- User-friendly, intuitive interface that's easy to use and customize
- Rapid return on investment so you can really do more for less
- Outstanding, responsive customer service and a community of users where you can share your experiences and learn from others

Why Elluminate?

- **Crystal-clear two-way audio** delivers synchronous Voice over IP that's accessible at low bandwidths and automatically optimized for use with other classroom elements. Push-to-talk hot key makes communicating easy.
- **Rich media support** enables live video via Webcam, multimedia content, and synchronized Web browsing with individual interaction.
- **ESP (Elluminate Sensory Perception) moderator tools** put the moderator in control with attendee lists, permission granting, and sequenced hand raising. Activity and emotion indicators inform the moderator of participant status and state-of-mind.
- **Shareable, interactive whiteboards** include drawing tools and image and PowerPoint import, with the ability to create private and backup slides. With AppSnap™, you can copy and paste anything from your desktop onto the whiteboard on the fly. Displayed objects are dynamic, so they can be edited, grouped, layered, or aligned.
- **Record and playback** capability enables those who missed a session to hear it at their leisure. Playing back recordings is just like being there—every bit of audio, every annotation, every shared application in the main room is recorded and played back in perfect synchronization.
- **Application sharing** allows moderators and participants to share applications, the entire desktop, or a desktop region. Give remote control to participants to facilitate hands-on learning and over-the-shoulder coaching. Whether you're sharing high-resolution images or flash animations, our application sharing performs flawlessly.
- **Breakout rooms** enable private audio, whiteboard, quizzing, and application sharing, with the ability to easily move participants and content between rooms.
- **Quiz Manager** enables the moderator to conduct interactive quizzes and surveys, load and store tests, and collect result statistics.
- **Direct text messaging** offers instant public and private messaging to one, all, or a selected group of participants. Messages can be filtered, time-stamped, and saved to track session communication.
- **Robust performance** enables participants to get whiteboard content quickly, share applications more effectively, and reconnect automatically if Internet connection is lost.
- **Flexible Elluminate Live! licensing** is available as a server-based or hosted service on a per-concurrent-user basis. Whether it's installed on your server or hosted by us, Elluminate Live! is easy to set up, easy to use, and easily customized with your course content.

Optimize Your eLearning Experience

"Elluminate Live! has performed flawlessly. It has enabled us to expand our capabilities without hiring more people. Like the Internet and email, we'll soon wonder what we did without it!"

Luciano Elias, EMD Biosciences

Elluminate Live! is built specifically for live, multi-media, many-to-many collaboration. Our unique Collaborative Communications Framework (CCF) automatically ensures that all participants are in sync, whether they have a dial-up modem or a high-speed LAN, a PC or a Mac. Our No User Left Behind™ technology means you always get the same superior quality, performance, and dependability—with no lag time or garbled communication.

From two-way audio, live video, and shared whiteboards to instant messaging, application sharing, and breakout rooms, all Elluminate Live! components are tightly integrated to provide the ultimate interactive environment for online meeting and training. Whether you have two participants—or two hundred—Elluminate Live! enables world-class communication, interaction, and education. Because that's what live eLearning is all about.

Minimum System Requirements

Server (100 Concurrent Users)

- Windows 2000/XP/2003, Solaris 9, Red Hat Enterprise Linux, Apple Xserve
- 1.1 GHz Pentium III for Windows/Linux, 750 MHz UltraSPARC II for Solaris, 2 GHz G5 for Xserve.
- 512 MB RAM
- 75 MB free disk space
- Static IP address with 4 mbps outbound bandwidth

Windows Client

- Windows 98/ME/2000/XP
- Pentium III 500 MHz processor
- 128 MB RAM
- 20 MB free disk space
- Soundcard with speakers and microphone or headset
- 28.8 kbps Internet connection

Mac Client

- Mac OS 9.1/9.2, Mac OS X 10.1/10.2/10.3
- G3 233 MHz
- 64 MB RAM (OS9), 128 MB RAM (OS X)
- 20 MB free disk space
- 28.8 kbps Internet connection

SPARC Solaris Client

- Solaris 9
- UltraSPARC IIc 300 MHz
- 128 MB RAM
- 20 MB free disk space
- Soundcard with speakers and microphone or headset
- 28.8 kbps Internet connection

Java Desktop System Client

- Java Desktop System 2
- Pentium III 1 GHz processor
- 256 MB RAM
- 20 MB free disk space
- Soundcard with speakers and microphone or headset
- 28.8 kbps Internet connection
